

Chemical Metering Pump Package

Metering Pump Packages are an integral part of water treatment for processed water, wastewater & drinking water applications

Global Treat, Inc. Chemical Metering Pump packages are available for base or wall mounting.

Single or Dual Pump injection packages are available with manual or automatic control, for feed rates of up to 48 gph at 100 psi.

The non-corrosive (polypropylene or fiberglass) mounting skids feature integral leak containment.

The optional tubing rupture disk can start up a secondary pump and/or signal alarm.

Features:

- Back Pressure and pressure relief valves
- 500 ml Calibration Column
- Pulsation Dampeners
- Diaphragm Protected Pressure Gauge
- Leakproof Tubing Connectors
- Strainers
- PVC Ball Valves
- NEMA 4x Controller

Our Single or Dual Pump Chemical Injection Packages give our customers the flexibility in design for controlling scale, corrosion, fouling, and microbiological contamination.
