

Chemical Metering Pump Package

Metering Pump Packages are an integral part of water treatment for processed water, wastewater, and drinking water applications.

Chemical metering pump packages are available for base or wall mounting.

Single or dual pump injection packages are available with manual or automatic control, for feed rates up to 48 GPH at 100 psi.

Non-corrosive (polypropylene or fiberglass) mounting skids feature an integral leak containment

Optional tubing rupture disk can start up a secondary pump and/or signal alarm.

LAS skid with tank and spill containment (pictured above)

FEATURES

- Back pressure and pressure relief valves
- 500 ml Calibration Column
- Pulsation Dampeners
- Diaphragm Protected Pressure Gauge
- Leak proof Tubing Connectors
- Strainers
- PVC Ball Valves
- NEMA 4x Controller

Single or Dual Pump Chemical Injection packages allow the flexibility in design for controlling scale, corrosion, fouling, and microbiological contamination
